aws | training and certification

Share your AWS Certification achievement

Digital badges make it easy.

Your AWS Certification validates your hard-earned cloud skills with an industry-recognized credential. We think that's something everybody should know. That's why each of our 12 certifications comes with a digital badge so you can share your achievement with employers, clients, educational institutions, and more. Now provided via Credly's Acclaim platform, AWS Certification digital badges come with new, flexible options for recognition and verification.

Simplified sharing

Share digital badges optimized for LinkedIn, Facebook, and Twitter with a single click, and get step-by-step guidance for adding your credential to your social media profile pages. You can even include your badge on your email signature.

Public profile for earned badges

You now have the option to create a public profile that displays all of your AWS Certification badges. Your profile provides one permanent link to showcase your full AWS Certification portfolio.

Flexible digital verification

Take advantage of multiple options for providing digital verification of your certification. Create direct links to each of your specific badges as well as your earner profile. Embed your badges on your personal website. Send a verification email via Credly's Acclaim platform. You can even publish a badge to a blockchain to create an immutable, permanent record of your achievement.

Detailed skills descriptions

Badge pages on Credly's Acclaim platform offer detailed descriptions of the skills validated by the badge. These descriptions offer a more robust indication of what skills your AWS Certifications represent.

Get AWS Certified and start sharing

You can share your new AWS Certification badges as soon as you earn them. To get started, just access your AWS Certification Account and look for the Digital Badges tab.
