No-code ML for faster decision making
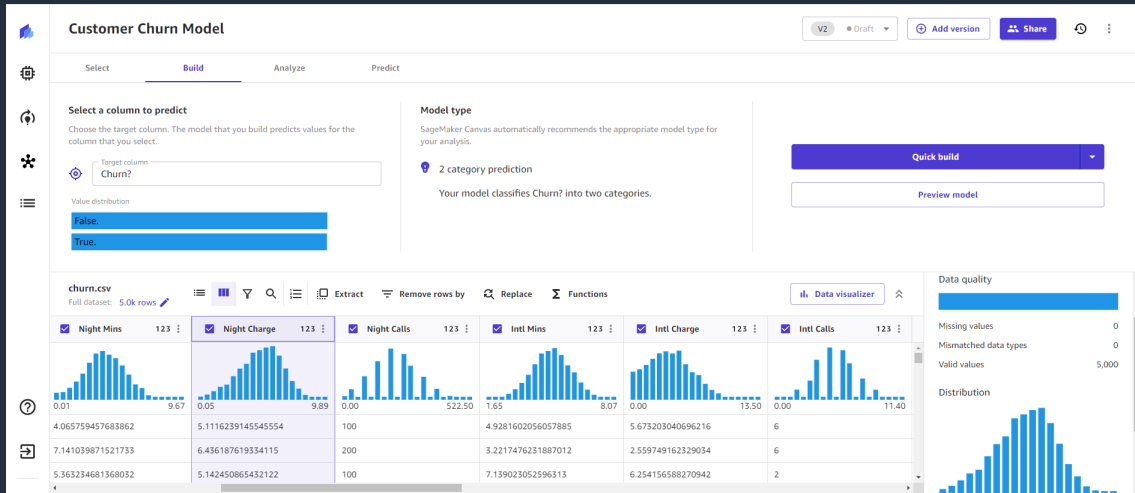

Davide Gallitelli

WW ML Specialist SA

Shyam Srinivasan

Principal Product Manager,
SageMaker Canvas

Amazon SageMaker Canvas

Solve any business problem thanks to Machine Learning – no code required

Generate accurate ML predictions for classification, regression, forecasting, natural language processing (NLP), and computer vision (CV) use cases

Automatically build custom ML models and generate single or bulk predictions with a few clicks.

Share ML models and collaborate with data science teams. Share predictions with Amazon QuickSight.

Usage-based pricing to reduce TCO – no license needed

Access ready-to-use models to extract information and generate insights from thousands of documents, images, and lines of text in minutes

SageMaker Canvas Updates – May 2023
