Learning paths make your next step clear.

Are you looking to add to your cloud skills? Learning paths offer recommended sequences of courses and certifications you can follow to help advance your skills or prepare you to use the AWS Cloud. Explore learning paths for common cloud roles or by solution area. APN Partners have dedicated paths, as well. We also offer in-depth AWS Ramp-Up Guides with curated resources to help build your knowledge of fundamentals, key concepts by role, and relevant best practices. Looking for more hands-on experience? Self-paced labs are a great way to get practice with AWS services and real-world cloud scenarios.

When you are ready, validate your skills with an AWS Certification exam

You can now take all AWS Certification exams virtually with online proctoring. With this added convenience and flexibility, it's now easier than ever to show your cloud skills are backed by an AWS Certification. All you need is a reliable internet connection, a webcam, and a quiet, private place to test.

How can I learn more?

More information on our AWS Certifications is available on our website, and the AWS Training and Certification blog has more information on online proctoring.
