Secure

Trust &
Confidence

DevSecOps / Security Observability > Continuous Security

- DevOps?
- Just change everyone's title from Ops → Devops?
- Full-Stack Ninjas?
- and Security Experts?

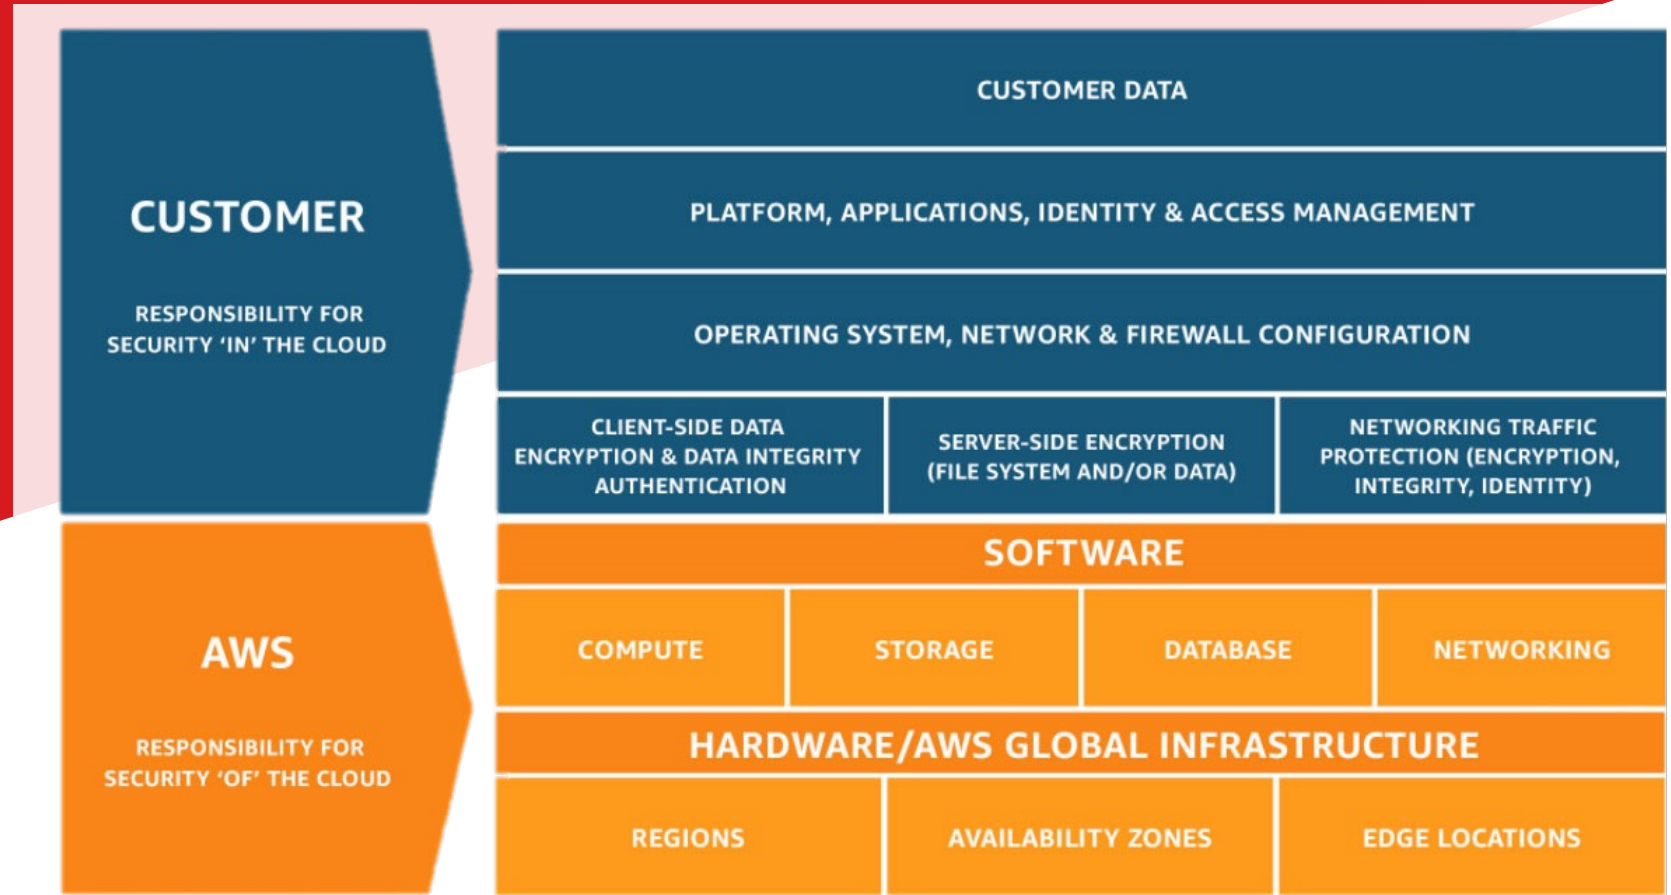

- 3 major movements brought out DevSecOps :
 - Waterfall to Agile transcended to DevOps
 - Monoliths have become Microservices
 - The data center is now giving away to cloud

Smoke without fire ?

- Availability, integrity, confidentiality, and udit
- Oh, and actual product features

Boosting the shared responsibility model

Top Security Partner

Advanced Technology, AWS Marketplace & AWS Managed Services

Reduce Attack Surface

AWS Launch Partner

for Detective, GuardDuty, VPC Ingress Routing, AppFlow, Control Tower & more

Protect Workloads & Containers

Built On AWS

Secure the CI/CD Pipeline

Optimized for AWS Customers

Thousand of Global Customers
10+ APN Competencies
Partner Ready Programs

Cloud Posture & Assurance

STRATEGIC ISV PARTNER

AWS Marketplace Seller Advisory Board, We Power Tech

Cloud-Native Applications Challenges

55% of companies have different teams responsible for cloud-native application security.

88% of companies experienced an attack on their cloud-native applications in the past 12 months.

60% of the cloud security challenges are due to insufficient visibility of security or compliance gaps.

73% of companies prefer a consolidated approach when protecting their environments.

Security Fueled by Leading Threat Research

Cyber Threats

Vulnerabilities & Exploits

Targeted Attacks

AI & ML

IoT

OT / IIoT

Cybercriminal Underground

Future Threat Landscape

Cloud and Container Research Team Examples

Kubernetes API Server
Denial of Service Vulnerability

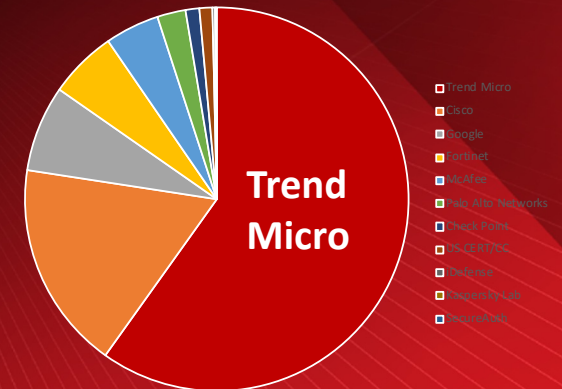

Apache Tomcat
Remote Code Execution Vulnerability

Kubernetes API Proxy Request
Handling Privilege Escalation
Vulnerability

450 internal researchers globally + 10,000 independent

Market leader in vulnerability disclosure

Attack Surface Risk Management

Discover Attack Surface • Assess Risk • Mitigate Risk

Zero Trust Architecture

- User & Identity
- Endpoints & Servers
- Email
- Cloud Infra
- Applications
- Code Repo
- Data
- Network
- 5G
- ICS/OT

Managed Services

Ecosystem Integration

IT Infra Operations

- Endpoint & Email Security
- Network Security

SOC Operations

- XDR
- ASM

Cloud Operations

- CNAPP
- Hybrid Cloud Security

Core Services

Security Engines | Open API | AI/ML | Big Data Analytics

Global Threat Intelligence

Attack Surface Intelligence | Zero Day Initiative | Threat Research

Build Secure.
Ship Fast.
Run Anywhere.

Trend Micro Cloud One™

Cloud migration

Cloud Native Applications

Cloud Operational Excellence

All-in one cloud security from **development to runtime to response**

How Cloud One Provides the Right Information

Experience #1

Discover cloud resources and threats

Experience #2

See context-rich, actionable insights

Experience #3

Get immediate remediation steps

Success ratio 100, 10, 1, Cloud One Security Services platform

Cloud Sentry takes

Agentless security in minutes

No performance impact

Local scanning maintains data sovereignty

Security team only needs admin rights to the account

7

Stand: S10

- - Security Risk Assessment & more

minutes to protect an entire
AWS account
with zero application impact.
