Generative AI: Proof of Value

Introducing TensorIoT's Generative AI Proof of Value (POV) for AWS

Experience the true potential of Generative AI with our tailored Proof of Value (POV) service, featuring **Wizdom AI** - a comprehensive technical framework for Generative AI deployment. Seamlessly integrate Generative AI, AWS Services, and Foundational Models like Bloom, Titan, and Jurassic 2 into your AWS account, and unlock the full power of AI-driven innovation for your organization.

Objectives:

Identify a high-impact use case and rapidly evaluate a foundational model using your unique data set, demonstrating immediate value and ROI to stakeholders. Realize a functional Proof of Value (POV) within a rapid **2-4 week** timeframe, encompassing design, planning, solution development, testing, and handoff.

Key Benefits:

1. Complete Model Control:
   - Models deployed within your AWS account
   - Access to open-source or licensed Foundational Models
2. Data Privacy and Ownership:
   - Train and search your own data
   - Data securely retained within your account
3. End-to-End Security:
   - Industry compliance maintained
   - Data sovereignty upheld
   - Security best practices adhered to
4. Seamless AWS Integration:
   - Effortless integration with AWS services
   - Scalable, cost-optimized managed services available on-demand
5. Dedicated Support and Maintenance:
   - Comprehensive support and maintenance services
   - Ongoing model performance monitoring
   - Regular updates to stay ahead of the curve

Value:

Our Generative AI Proof of Value (POV) service empowers you with full control over both your models and data, while providing end-to-end security and seamless integration with AWS services. Leverage the expertise of our dedicated support and maintenance team to ensure continued success and stay at the forefront of generative AI technology.

Embark on a transformative journey with our Generative AI Proof of Value (POV) for AWS, and unlock the full potential of your organization today.

About TensorIoT

TensorIoT provides commercial customers with innovative products, solutions, and consulting to deliver business value from AI, IoT, data, and machine learning technology.

TensorIoT is an AWS Advanced Consulting Partner and has achieved the AWS IoT Competency, AWS Machine Learning Competency, AWS Machine Learning Operations Competency, AWS Applied-AI Competency, AWS Industrial Software Competency, and many other competency designations. The company also has multiple AWS Service Delivery credentials for AWS services.

TensorIoT delivers successful projects to clients from startups to Fortune 50 companies through its offices in North America, Europe, and Asia. TensorIoT is customer obsessed and the company's global team has adopted the AWS leadership principles as their own. With deep experience delivering complete end-to-end solutions from edge devices to end users in IoT, and from data engineering to automated pipelines in ML, the TensorIoT team of AWS certified architects, data engineers, and developers accelerates customers' realization of their technology and business goals.
