DB Best application modernization on AWS

Consulting Offer

Accelerate your modernization. Reduce costs. Reach new customers.

With a long history of enhancing organizations' service offerings on the cloud, DB Best provides a simplified path to Amazon Web Services (AWS) with a team of experts that have seen it all.

Benefits

- **Modernize your applications** to run natively on AWS services including Amazon Aurora
- **Migrate your existing customers** through upgrade and migration packages to move them from earlier versions of your software to AWS
- **Provide a migration service** to guide your customers through the migration and upgrade process so that they can take full advantage of AWS services

Customer contribution

- Discuss your modernization process and timeline with a dedicated DB Best project team and establish what resources and team members will be needed from you
- Make your architecture and infrastructure available to DB Best so we can understand your current state and craft a future state on AWS

Key activities

Discovery workshop (up to 2 days): Workshop in which DB Best experts will clearly outline AWS services that would be necessary to support your solution. Whiteboard preliminary future state architecture design strawman

Future state architectural design (5 – 7 days): Analyze your existing applications in depth and iterate with your team to architect the future state of your solution

Proof-of-Concept (12-15 days): Take a subset of your existing application and deploy it on AWS to provide a better scope of your overall solution. This will help develop a highly available solution that meets your scalability and security requirements

Solution Space

Discover scalable and secure solutions that will empower you to achieve your business needs with Amazon Web Services (AWS) and AWS Partner Network (APN) Partners that have attained AWS Competency designations. Customer ready solutions are based on architectures validated by AWS, include a combination of AWS services and APN Partner technologies, can be deployed quickly with solution accelerators like AWS Quick Starts, and feature optional consulting offerings provided by APN Partners, to accelerate your cloud transformation.

DB Best is an APN Advanced Consulting Partner with validated database migration capabilities
