Onica cloud-native application development on AWS Consulting Offer

You know how to build apps. We know AWS.

Build a cloud-native architecture for your software products leveraging Amazon Aurora. Free yourself from commercial databases by leveraging a cloud-native architecture that focuses on simple, one-click cloud deployments. Deliverables include design documents and a plan for proceeding into development.

Benefits

- **Make your applications more accessible:** Eliminate commercial databases and build a one-click AWS deployment option. Your customers will no longer need to manage licensing
- **Strengthen security and compliance posture:** Strengthen your application's security posture on AWS
- **Architectural optimization:** Utilize AWS technologies to improve application performance and customer adoption. Encourage customers to adopt your applications by eliminating the need for third-party tools
- **Funding to offset migration costs:** Gain access to AWS funding to offset costs for re-platforming, as well as customer trials and migrations of your product on Amazon Aurora

Customer contribution

- Attendance from key stakeholders, including technical managers from the software development and product management teams
- Access to architecture documents and application source code

Key activities

On-site enablement workshop

- **AWS basics boot camp:** Outline networking, databases, compute, analytics, and other infrastructure services on AWS
- **Serverless concepts:** Demonstrate how function-as-a-service (FaaS), cost management, auto-scaling, high-availability and durability are achieved on AWS
- **AWS cloud-native offerings:** Explore the role of AWS Lambda, Amazon Aurora, Amazon API Gateway, Amazon Kinesis, AWS Fargate, and other services in application infrastructures

Discovery & architectural design

- White-boarding session on future state of your application leveraging AWS services

Solution Space

Discover scalable and secure solutions that will empower you to achieve your business needs with Amazon Web Services (AWS) and AWS Partner Network (APN) Partners that have attained AWS Competency designations. Customer ready solutions are based on architectures validated by AWS, include a combination of AWS services and APN Partner technologies, can be deployed quickly with solution accelerators like AWS Quick Starts, and feature optional consulting offerings provided by APN Partners, to accelerate your cloud transformation.

*AWS and partner funding available. Rules and restrictions apply.
 *Regional coverage available in North America.
