Virtusa application modernization on AWS

Consulting Offer

Build your application modernization game plan

Get a clear picture of your application and database workloads so you can understand how to best run them leveraging Amazon Aurora and other AWS technologies. Then, create a business case and ROI for your AWS migration and application modernization efforts.

Benefits

- **Reduce time to value:** Align your resources, time, and effort toward customer rollouts by automating infrastructure management
- **Minimize risk:** Establish a robust business continuity and disaster recovery solution
- **Shed technical debt:** Spin up multiple environments simultaneously to test code without infrastructure constraints

Customer contribution

- Provide key workload details: volume, users, peak usage behavior statistics, operating systems, and software (version and edition)
- Give insight into upstream and downstream integration and interface points with the application and database
- Share current Recovery Point Objective and Recovery Time Objective metrics and SLAs

Key activities

Map existing application and database workloads to AWS workloads using a Workload Qualification Framework (WQF)

Run the AWS Schema Conversion Tool (AWS SCT) to ascertain the migration effort from your on-premises databases to Amazon Aurora

Provide an estimated timeline, scope, and cost of converting one existing database to Amazon Aurora

Solution Space

Discover scalable and secure solutions that will empower you to achieve your business needs with Amazon Web Services (AWS) and AWS Partner Network (APN) Partners that have attained AWS Competency designations. Customer ready solutions are based on architectures validated by AWS, include a combination of AWS services and APN Partner technologies, can be deployed quickly with solution accelerators like AWS Quick Starts, and feature optional consulting offerings provided by APN Partners, to accelerate your cloud transformation.
