1

CHOICE

AWS provides the most choice and proven approaches to SAP on cloud success.

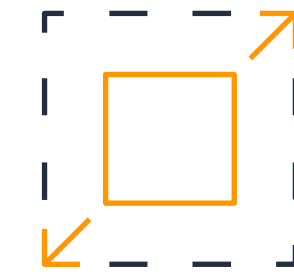

Lift-and-shift your existing SAP systems as the first step toward modernization

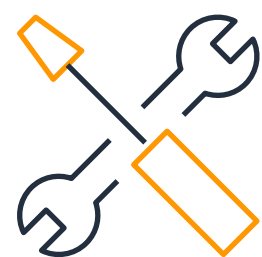

Modernize business processes with AWS services to gain new capabilities

Upgrade from **AnyDB to Suite on HANA** to gain in-memory capabilities and retire technical debt

Accelerate your **S/4HANA migration** with both native AWS installation and subscription offerings like RISE with SAP

Maintain the flexibility to re-size your environment as your needs change with a consistent, cloud-native experience across all instances and services

[Back to Top](#)

2

COST

Reduce SAP total cost of ownership today and into the future with the last infrastructure upgrade you will ever have to make.

Right-size your SAP landscape, eliminate overprovisioning, and consolidate systems/data

Offset migration costs through service credits and partner support via the AWS Migration Acceleration Program (MAP) for SAP

Eliminate hardware refresh costs and benefit from continuous improvements to the AWS Global Infrastructure

106 price reductions since AWS launched in 2006

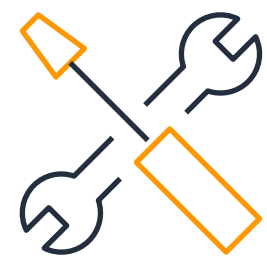

According to an IDC study, **85%** of respondents reported moderate or significant cost savings by running SAP on AWS¹

3

INNOVATION

Use AWS as your platform of innovation to modernize business processes, build new products, and re-imagine your customer experience.

200+ AWS services including offerings for IoT, data lakes, AI/ML, image recognition, chatbots, and more

Use the same tools as Amazon.com to improve your customer experience and supply chain processes

Over 90% of new features and services are built based directly from customer feedback

A growing selection of AWS-native offerings for SAP innovation from partners like Accenture, Deloitte, Linke, and more

“We have increased the value of our SAP systems by integrating SAP with AWS technologies because we can steer the business in near real-time.”

Yuriy Volosenko

Director for Enterprise Applications and Architectures, Zalando

on using 36+ AWS services with SAP S/4HANA to improve their customer experience

4

INFRASTRUCTURE

Improve SAP system reliability by running on the world's most secure, extensive, and reliable global cloud infrastructure.

AWS Global Infrastructure consists of...

25 Regions

80 Availability Zones

2x more Regions with multiple AZ's than the next largest cloud provider*

| 10 years in a row as Gartner Magic Quadrant Cloud Infrastructure & Platform Services leader²

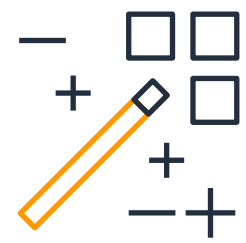

*AWS Regions provide multiple, physically separated and isolated Availability Zones which are connected with low latency, high throughput, and highly redundant networking. Unlike other cloud providers, AWS has at least two Availability Zones in every Region, giving customers more flexibility and choice in how they architect for high availability and disaster recovery.

5

AUTOMATION

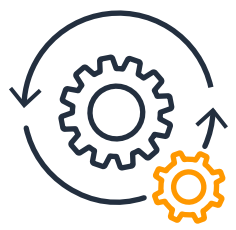

Automate deployment and operations to deliver consistent results and free up resources to focus on value-adding activities.

Deploy production-ready SAP landscapes in <2 hours with **AWS Launch Wizard**

Simplify and accelerate HANA backups with up to 2GB/sec speeds with **AWS Backint Agent**

Offload infrastructure management to enhance security and efficiency with **AWS Managed Services**

Take advantage of **AWS Professional Services** offerings for SAP including Auto Scaling, Auto Start/Stop, Serverless System Monitoring, and more

“AWS Launch Wizard is a magical tool—it enables me to reduce SAP S/4HANA deployment time by at least 50%, enabling me to do what would normally require an entire team by myself.”

Yatin Bhatt

Senior SAP Basis Engineer, Twitch

on using AWS Launch Wizard to automate SAP S/4HANA deployment

[Back to Top](#)

6

PERFORMANCE

Improve SAP application performance with the largest selection of cloud-native, SAP certified instances from 256GB to 24TB.

48TB

Scale out to 48TB for SAP S/4HANA and 100TB for SAP BW/4HANA

80,000 IOPS

Run up to 80,000 IOPS per instance with consistency

10-30%

The AWS Nitro system offers 10-30% higher SAPS than comparable VM instances across public clouds³

“Our performance of SAP on AWS is off the scale. We reduced our monthly billing cycle from four days to one day and have significantly reduced our overall annual IT costs.”

Carlos Galiano

Chief Information Officer, Seaco

on using AWS's cloud-based solutions to replace Seaco's traditional on-premises data center facilities

7

SECURITY

Strengthen your security posture, simplify compliance, and automate routine security tasks.

90 security standards and compliance certifications

The **only** cloud vetted and accepted as secure enough for top-secret workloads

All **117** AWS services that store customer data offer the ability to encrypt that data

AWS operates two SAP NS2 Regions for customers in government and regulated industries

“As an aerospace and defense firm, security is absolutely essential. That’s why we chose AWS GovCloud. We then built the foundational and security blueprints on top of it all.”

Jeff Wright

Cloud Services Sr. Manager,
Lockheed Martin

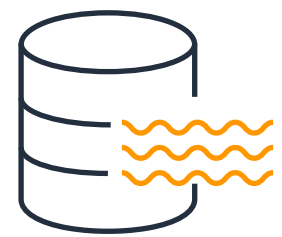

on moving their SAP Suite on HANA system to AWS

8

ANALYTICS

Uncover deeper insights from your SAP data to improve operational efficiency and innovate faster.

Combine SAP data with non-SAP data and apply analytics within an enterprise data lake

Add intelligence to your SAP applications with the broadest and deepest set of machine learning services

Reduce costs with Amazon S3 and save up to an additional 70% with Amazon S3 intelligent tiering

"We're now able to analyze automated visual inspection data and use artificial intelligence to identify opportunities to produce even higher-yield fibers. It wouldn't be remotely possible to do this if all our data was still siloed at each plant site."

Elizabeth Gonzalez

Analytics leader at Koch Industries/INVISTA

on using SAP ECC with AWS analytics services

9

PARTNER COMMUNITY

Gain the experience, tooling, methods, and best practices of the largest SAP cloud partner community to streamline your migration or transformation.

60+

Partners have been vetted to demonstrate SAP customer success through the AWS SAP Competency Program

91%

of new SAP on AWS customers are also working with AWS Partners

4,500+

software listings on AWS Marketplace from 1,400 ISVs

"Working remotely was new to all of us. Yet we managed to build a platform of 130-plus virtual machines and migrate 15 SAP applications and around 35 terabytes of data in just 10 weeks without disruption to the organization. It shows how flexible Capgemini and AWS were around the project and committed from the start to delivering a successful outcome. We established a high level of trust."

Darren Miles

Chief Information Officer, Centrica

on working with AWS SAP Partner Capgemini to migrate S/4HANA to AWS
