

AGENDA AT A GLANCE

Time (PST)	Opening Keynote Data: The Genesis for Invention						
Tracks & Breakout Sessions							
	Track 1 Build a data-driven organization	Track 2 The transformative value of AI	Track 3 Empower builders with machine learning tools	Track 4 Deploy scalable, cost-effective analytics workloads	Track 5 Build future-proof applications	Track 6 Break down data silos	Track 7 Secure and govern all your data
9:00am to 9:30am	Opening Keynote Data: The Genesis for Invention						
Session 1: 9:30am to 10:00am	Becoming a data-driven organization LEVEL 100	Accelerate business growth with personalized user experiences LEVEL 200	Accelerate your ML journey with Amazon SageMaker low-code tools LEVEL 200	Democratizing your organization's data analytics experience LEVEL 200	Deploy modern and effective data models with Amazon DynamoDB LEVEL 200	Zero ETL: Connect to all your data LEVEL 200	End-to-end data and machine learning governance on AWS LEVEL 200
Session 2: 10:00am to 10:30am	Building a smarter organization: Powered by machine learning LEVEL 200	Deliver high accuracy and efficiency with intelligent document processing LEVEL 200	Productionize ML workloads using Amazon SageMaker MLOps LEVEL 200	Data warehousing reinvented for today's needs LEVEL 300	Deep dive into Amazon Aurora and its innovations LEVEL 300	Democratizing data for self-service analytics and machine learning LEVEL 300	Disaster recovery design patterns for data resilience LEVEL 200
Session 3: 10:30am to 11:00am	How AWS Trainium and AWS Inferentia help train and deploy 100B+ parameter models at scale LEVEL 200	Transform your existing contact center with Conversational AI and Call Analytics LEVEL 300	Boost ML development productivity with managed SageMaker notebooks in the cloud LEVEL 300	Simplify and accelerate data integration & ETL modernization with AWS Glue LEVEL 300	Amazon RDS Blue/Green deployments, optimized writes, & optimized reads LEVEL 200	Drive new business insights from data lake for your core applications LEVEL 300	Build resilient data architectures with AWS LEVEL 200
Session 4: 11:00am to 11:30am	Use cases for maximizing business value from data LEVEL 200	Natural language powered chatbots with Amazon Kendra & Amazon Lex LEVEL 200	Train ML models at scale with Amazon SageMaker LEVEL 200	Build modern data streaming analytics architectures on AWS LEVEL 300	Achieve real-time, cost-optimized performance with Amazon ElastiCache LEVEL 300	Best practices for optimizing data lake performance on Amazon S3 LEVEL 300	Transform responsible AI from theory into practice LEVEL 200
Session 5: 11:30am to 12:00pm	Solve common business problems with AWS AI/ML services LEVEL 200	Unlock AI/ML-powered customer experience improvements with Amazon Connect LEVEL 200	Deploy ML models for inference at high performance and low cost LEVEL 200	End-to-end log analytics with OpenSearch Serverless and Kinesis Data Firehose LEVEL 200	Build scalable applications with purpose-built databases LEVEL 200	Migrate your on-premises data lake to AWS to gain insights LEVEL 300	Solving large-scale data access challenges LEVEL 300
Session 6: 12:00pm to 12:30pm	Data as a strategic asset for building a better business with GE Digital LEVEL 100	Enable predictive maintenance for industrial equipment with machine learning LEVEL 200	Practical decision-making using no-code ML LEVEL 200	Reinvent how you derive value from your data with Amazon QuickSight LEVEL 300	Elastic scaling with Amazon DocumentDB LEVEL 200	Integrate third-party data into a modern data architecture LEVEL 200	Meeting digital sovereignty requirements on AWS LEVEL 200
Session 7: 12:30pm to 1:00pm	Carrier's data-led path to sustainable buildings and cold chain solutions LEVEL 100	Building, training, and deploying a movie recommendation engine LEVEL 200	Transform genomic and biological data into insights LEVEL 200	Migrating self-managed open-source to fully managed AWS services to reduce costs and simplify operations LEVEL 300	New innovations in the AWS operational database portfolio LEVEL 200	Understanding data mesh architectures on AWS LEVEL 200	Democratize data with governance: Bring together people, data, and tools LEVEL 200
Bonus AWS Pi Day Content: Please stick around from 1:00pm to 5:00pm PST for news around launches, demos, and technical sessions to learn more about how AWS delivers the most comprehensive set of services and solutions for your entire data journey. See Pi Day section above for session details.
