

The proven cloud for RISE with SAP

Your choice matters

Leading organizations are modernizing their ERP landscapes with RISE with SAP. To maximize the value of your RISE with SAP deployment and achieve your transformation goals, you need a cloud provider with a proven track record of delivering the performance, reliability, security, and innovation capabilities your business deserves. Learn why thousands of customers choose AWS—the world’s most secure, reliable, and extensive cloud—for their SAP workloads.

Experience the AWS advantage for RISE with SAP

15

years supporting SAP applications in the cloud

5x

ISG SAP HANA Infrastructure Services Leader¹

80+

SAP BTP services running on AWS, more than any other cloud provider²

Accelerate your move to cloud ERP

Simplify your journey to SAP S/4HANA Cloud with SAP BTP services running only on AWS to help manage data and preserve valuable ABAP extensions during migration.

Safeguard your migration by working with the world leaders in SAP on cloud consulting through RISE with SAP on AWS authorized partners resellers. Ready your team for the cloud with free online training from AWS.

Why RISE with SAP customers choose AWS

Maximize performance

Give your RISE with SAP users the performance they deserve with the AWS Nitro System which delivers practically all of the compute and memory resources of the host hardware to your instances.

Protect from business disruption

Experience RISE with SAP on the world’s most secure, reliable, and extensive cloud infrastructure. Operate with confidence, employing Recovery Point Objective Zero (RPO 0) globally for short range disaster recovery and 143 security standards and compliance certifications.

Innovate faster and transform your business

Access 200+ AWS services, including offerings for data lakes, AI/ML, image recognition, chatbots, and more. AWS also offers the broadest set of SAP BTP services of any cloud provider, including powerful services not available on other providers²

Improve sustainability in the cloud

Lower your carbon footprint by up to 88%³ when you run workloads like RISE with SAP on the AWS Cloud. AWS is on a path to rely on 100% renewable energy by 2025⁴ and is committed to net zero carbon by 2040.

“ What we really benefited from was the expertise of AWS, not just in the cloud, but in SAP... we’ve not found anybody who innovates at the same pace. ”
